PROFESSIONAL SUMMARY

IT Service Management Manager experienced in coordinating P1/P2 major incidents, change governance, CAB operations, and post-incident follow-ups at HOOPP. Skilled in cross-functional incident leadership, stakeholder communication, ITSM process controls, and service reliability, supported by a technical background in cloud and infrastructure.

SUMMARY OF QUALIFICATIONS

- Coordinate major incident bridges, business-impact assessments, vendor escalations, and recovery validation.
- Facilitate Change Advisory Board (CAB) meetings and support production change governance.
- Deliver structured, time-sensitive updates to technology leadership during high-impact incidents.
- Support post-incident reviews, problem follow-up, runbooks, and continuous ITSM process improvement.
- Strong communication, judgment, prioritization, and organization in high-pressure environments.
- Experience with ServiceNow, Azure DevOps, PagerDuty, and cross-functional technology teams.

EDUCATION & CERTIFICATIONS

ITIL Foundation (Version 5) – PeopleCert **Jun 2026 – Jun 2029**

Seneca College **North York, ON**
Computer Systems Technology Advanced Diploma **May 2023 – Present**
- President's Honour List

Sheridan College **Brampton, ON**
Social Service Worker Diploma **Sept 2019 – Apr 2021**
- Cumulative GPA: 3.6 – Faculty of Social Sciences

ANALYTICAL AND TECHNICAL SKILLS

- ITSM: ServiceNow Incident, Change and Problem Management; CAB coordination; Azure DevOps; PagerDuty.
- Monitoring & reporting: AppDynamics, Splunk, Power BI, Azure Monitor and Log Analytics.
- Cloud: AWS (EC2, VPC, S3, IAM, RDS, Route 53); Microsoft Azure VMs, virtual networks and AVD.
- Enterprise systems: Microsoft 365, Entra ID, Intune, Windows Server and Active Directory.
- Networking: TCP/IP, subnetting, VLANs, routing, switching, ACLs and DHCP.
- Linux system administration, VMware/VirtualBox, Git, CI/CD and infrastructure automation labs.

PROJECT – AMAZON WEB SERVICES (AWS)

- Designed secure AWS infrastructure using VPCs, EC2, S3, IAM, RDS and Route 53.
- Configured private access with Systems Manager, internal load balancing and VPC peering.
- Deployed a Roundcube email server with Amazon RDS and managed access with IAM roles.

PROJECT – AZURE VIRTUAL DESKTOP (AVD)

- Deployed and configured Entra-joined AVD host pools, session hosts, application groups and workspaces.
- Configured host scaling settings, RBAC, agent updates and Azure Monitor / Log Analytics diagnostics.

WORK EXPERIENCE

Manager, IT Service Management — **HOOPP | Sep 2025 – Present**

- Coordinate P1/P2 major incident response, bringing together technical support teams and external vendors to assess impact, troubleshoot service disruptions, and validate recovery.
- Initiate and facilitate incident bridges, maintain incident timelines, and provide structured leadership communications at a 30-minute cadence during major incidents.
- Facilitate weekly Change Advisory Board (CAB) meetings, reviewing change risk, scheduling, stakeholder readiness, and governance requirements.
- Support emergency and expedited changes, required approvals, change freeze controls, and accurate change records in ServiceNow.
- Coordinate post-incident reviews and retrospectives, tracking corrective actions, problem follow-ups, and improvements to incident response procedures.
- Maintain and improve escalation workflows, on-call contacts, communications templates, and operational runbooks across internal IT teams.
- Work across cloud infrastructure, Microsoft 365 and business applications to improve service continuity and ITSM processes.

Cloud Engineer / Incident Manager – Co-op — **HOOPP | Sep 2024 – Apr 2025**

- Supported P1/P2 incident bridges, technical team coordination, and stakeholder communications.
- Tracked incidents and changes through ServiceNow and Azure DevOps and supported CAB activities.
- Contributed to post-incident follow-ups, reporting, and ITSM metric dashboards in Power BI.
- Monitored services using AppDynamics and Splunk and gained exposure to BCM/DR processes.

IT Assistance (Part-Time) — **DEX Technology | Nov 2023 – Nov 2024**

- Supported IT operations and resolved 90% of tickets on first contact.
- Diagnosed and resolved hardware/software issues efficiently.
- Helped implement solutions that improved infrastructure efficiency by 20%.

Fire Prevention and Site Security Supervisor — **Stellantis Canada | May 2020 – Apr 2025**

- Supervised a high-performing team and coordinated site-wide security measures.
- Improved safety response and reduced breaches by 35% through incident analysis.

Research Associate — **Social Council of Peel | Dec 2020 – Apr 2021**

- Conducted in-depth research and improved client records and retention through analysis.
